Intro to QGIS - DH Certificate Program

Frank Donnelly, GIS & Data Librarian, Brown University

October 6, 2022

Requirements for Doctoral Certificate DH Program

Students who wish to apply this workshop to the Doctoral Certificate in Digital Humanities to satisfy the requirements for Digital Tools and Methods will need to complete a homework assignment that demonstrates basic proficiency with the workshop material.

   Please choose and complete one of the following options:

1. At the end of Chapter 4 *Thematic Mapping*, Section 4.6 *Considerations and Next Steps*, complete the exercise in the last bullet point to create a thematic map of internet access by country using the sample data that's provided with the tutorial.

   or

2. Find another country-level tabular dataset, or US-state tabular dataset that's of interest to you, and use the country or state boundary files in the sample data to create a thematic map.

   Your final map layers should be in a projected coordinate system, and your finished map should contain a title, legend, and notes on sources.

   Export and save the final map as a PDF file, and email it to the Center for Digital Scholarship Director Dr. Ashley Champagne and GIS and Data Librarian Frank Donnelly. The deadline for submission is one month from the date you took the workshop.
